  <div class="large-12 columns">
    <p>
      You have successfully installed XAMPP on this system! Now you
can start using Apache, MariaDB, PHP and other components.
      You can find more info in the <a
href="/dashboard/faq.html">FAQs</a> section or check the <a
href="/dashboard/howto.html">HOW-TO Guides</a> for getting started
with PHP applications.
    </p>
    <p>
      XAMPP is meant only for development purposes. It has certain
configuration settings that make it easy to develop locally but that
are insecure if you want to have your installation accessible to
others.
      If you want have your XAMPP accessible from the internet, make
sure you understand the implications and you checked the <a
href="/dashboard/faq.html">FAQs</a> to learn how to protect your site.
Alternatively you can use <a
href="https://bitnami.com/stack/wamp">WAMP</a>, <a
href="https://bitnami.com/stack/mamp">MAMP</a> or <a
href="https://bitnami.com/stack/lamp">LAMP</a> which are similar
packages which are more suitable for production.
```

```html
      </p>
      <p>
        Start the XAMPP Control Panel to check the server status.
      </p>
